SECTION - A

READING COMPREHENSION (SEEN)

1. Read the passage carefully and answer the questions that follow :

It is the last time we shall be walking with Bapu. It was an agonizing walk. Thousands silently watched the procession. Bapu lay on an open truck covered with flowers. Thousands of people wept, trying to touch Bapu's feet. It was impossible to move in the thick crowd.

As I moved forward slowly I understood I was not merely in the midst of grieving people. This was even more than the funeral procession of India's beloved leader. I was among people for whom walking with Bapu had a special meaning. We had walked with Bapu over the rough and smooth of India's recent history. We could not now accept the fact that the man who had led us over many difficult paths, was never going to walk with us again. Bapu's slight figure had walked, staff in hand, over a large part of India. To walk is to make slow progress. It is to think with clarity and closely look at all that is around you, from small insects to the horizon in the distance. Moreover, to walk was often the only way open to the average Indian. It required no vehicle except his own body and cost him nothing but his energy.

A. Write the correct alternative to complete the following sentences: $1 \times 5 = 5$

(a) The last walk with Bapu was

(i) pleasant (ii) painful

(iii) strange (iv) delightful

Ans: _____

(i) staff (ii) flag

(iii) book (iv) bag

Ans: _____

(d) The narrator comments that to walk is to make

(i) a tiresome journey (ii) no progress

(iii) rapid progress (iv) slow progress

Ans: _____

(e) According to the narrator, walk required

(i) a lot of money

(ii) vehicle

(iii) one's own body and energy

(iv) a walking stick

Ans: _____

B. Complete the following sentences with information from the text: $1 \times 3 = 3$

2. Read the poem and answer the questions that follow :

I must go down to the seas again, for the call of the running tide
Is a wild call and a clear call that may not be denied;
And all I ask is a windy day with the white clouds flying,
And the flung spray and the blown spume, and the sea-gulls crying.

I must go down to the seas again, to the vagrant gypsy life,
To the gull's way and the whale's way where the wind's like a whetted knife;
And all I ask is a merry yarn from a laughing fellow-rover,
And quiet sleep and a sweet dream when the long trick's over.

READING COMPREHENSION (UNSEEN)

3. Read the following passage and answer the questions that follow :

For the second year in a row, tiger population in the Indian Sundarbans has shown an increase. This year, a camera-trap exercise has captured at least six more tigers in the mangroves.

According to a forester associated with the exercise, 87 unique frames were captured by the camera-traps in the mangroves, including the tiger reserve area and the South 24 Parganas forest division. The count was 81 last year. The latest exercise was conducted between December 2016 and June 2017.

The mangroves is home to at least 87 tigers, with the possibility of more big cats being present, said the forester. He further added, "It's not possible to photograph all the tigers in a forest."

While the average figure is yet to be analysed, officials expect the number to be around 90 this time, compared to last year's 81. "The trend is positive, but we are still in the process of analysing the final figure that will also be checked by the Wildlife Institute of India," said the Chief Wildlife Warden Ravikant Sinha.

He, however, added that the cubs which were camera-trapped last year have grown up and have probably been photographed again this year. This, he observes, can be a reason behind the positive trend.

Sources revealed that, while 62 tigers were photographed in the tiger reserve area - seven more than last year - 25 were clicked in the South 24 Parganas division, the forests outside the core area. Pictures of three cubs were also captured, though they were not included in the final figure.

All eyes are now on the 1500 sq. km South 24 Parganas forest division that has added, at least, eight tigers in the last five years. It recorded seventeen tigers when the camera-trap exercise was first conducted in 2012.
